To Whom It May Concern;

Greetings! Homeland Builders installed a solar water heater on our house in December 2005. Our house is over one-hundred years old and required a substantial amount of work to retrofit the system to our plumbing. I'm very pleased to say that Homeland Builders did an excellent job installing the system, performing the job in a timely manner and utilizing the best materials. The quality of work was outstanding as well; nearly five years later the system is functioning perfectly and has never needed repairs. Additionally, Homeland Builders installed the system at a very competitive price. We couldn't be happier with the system or the service we received.

If you have any questions or require more information, please feel free to contact me.

Sincerely,

George Brach
